PLC coupling S5 and S7

Data-processing/-recording of PLC-data?

Data-logging of recorded process-values in a DB writing or read out in the connected PLC via network, thanks to RFC1006-communication i n the devices is nothing in the way.

Even accesses to flags (individual bits of the words) are possible at any time. Configure the data via the integrated web-server that gets target-PLC or returns the necessary-data.

If the PLC does not have an Ethernet-port, with optional adapters, enable this communication:

 * S5 over S5-LAN++
 * S7-PPI/MPI/Profibus over S7-LAN
S7-PLC over USB

Communication with S7-PLC via USB, just how and with what?

Data-communication with S7-PLC from PC or other devices via USB, which interface is required. Questions you don't have to worry about. With "S7 over USB" you get the right interface-products for PPI, MPI and Profibus.
Which one you use then is up to you.

| PLC coupling (data exchange between PLC's) |
| --- |

Your pumping stations report the water levels of the central control via telephone network. The central office itself can of course transmit commands/messages to the substations as well. Therefore no dedicated line is required, it's sufficient when the stations connect via network (DSL-router).
SMS Email with LOGO!

Send of all kinds of SMS-messages controlled by the LOGO!-Control

Move wirelessly around the S5-PLC and communicate for example ONLINE in the status

Remote maintenance of a S7-PLC[FREEWARE without support]

You have to solve a problem in the PLC-program, but the installation is not placed nearby? No problem, start your PG-2000-software with "option teleservice", activate your modem and after selection intra PG-2000-software access to the PLC is possible as if being on-site.
